## SUMMARY

Full Stack Web Developer with experience building web applications using the MERN stack and related technologies. Focused on writing clean, maintainable code and working effectively in remote and team environments. Able to deliver stable and functional solutions that meet project requirements.

---

## EXPERIENCE

### Full Stack Developer

#### Enorus

February 2025 - PRESENT, Remote

- Developed and maintained full-stack real estate web apps using React.js and Node.js with 98% test coverage.
- Delivered Version 1.0 on time with clean architecture, reducing tech debt by 30%.
- Reduced API efficiency by 40% and application uptime to 99.9%.

### Full Stack Developer

#### IVY Interactive Solution

May 2024 - February 2025, Islamabad

- Developed a real-time chat app with WebRTC, improving user engagement by 45%.
- Boosted mobile responsiveness by 30%, reducing bounce rate.
- Enhanced reliability through unit/integration testing, cutting bugs by 40%.

### Full Stack Developer

#### Darken Tech

April 2024 - August 2024, Remote

- Engineered a stock management system with real-time tracking, reducing discrepancies by 40%.
- Helped deploy 4 major features, contributing to a 95% client satisfaction rate.
- Reduced production errors by 50% through reviews and refactoring.

### MERN Stack Developer

#### The Cloud Services

October 2024 - May 2024, Islamabad

- Created a BMS (Building Management System) that reduced manual workflows by 40%.
- Enhanced performance, cutting downtime by 50% and speeding up page load by 30%.
- Secured app with JWT and RBAC, increasing user data protection compliance.

### Code Reviewer

#### Microverse

February 2023 - March 2024, Remote

- Reviewed 300+ full-stack apps, improving code clarity and architecture.
- Guided global devs to fix issues, lowering resubmissions by 40%.
- Promoted Git workflow and clean code practices, adopted by 30% more students.

---

## PROJECT

### Food Donation Finder

[fooddonationfinder.netlify.app/](http://fooddonationfinder.netlify.app/)

- Matched donors with NGOs using geolocation, improving food pickups by 55%.
- Reduced spoilage by 40% through real-time alerts.
- Delivered MVP 30% ahead of schedule, raising donor signups by 25%.

### Degree Tracking and Validation System

[fuudtvs.netlify.app/](http://fuudtvs.netlify.app/)

- Developed a digital system that cut student visits by 70% and paperwork by 60%.
- Included secure logins and admin dashboards; increased transparency by 50%.
- Handled real-time application updates with 40% faster processing.

### Expense Tracker

[myexpensetrackerapp.vercel.app/](http://myexpensetrackerapp.vercel.app/)

- Built a personal finance tracker with auth, charts, and CSV export.
  - Delivered <150ms response time for expense filters.
  - Improved budgeting accuracy by 30% and visual clarity by 45%.
-

## EDUCATION

---

### BS – ComputerScience

Federal Urdu University · Islamabad, Pakistan · 2022

· Final Year Project: Degree Tracking and Validation System (MERN Stack).

---

## AWARDS & HONORS

---

### Microverse Software Development Program

Microverse · 2023

### Cutshort Certified React.js - Basic

Cutshort · 2023

---

## SKILLS

---

JavaScript, TypeScript, Ruby
